

Gen-Ai roadmap

1. Learn Python
 - Numpy, pandas
 - Supervised and unsupervised algorithm
2. Dive into deep learning
 - ANN, CNN, RNN, Tranformer
 - Hugging face, pytorch
3. Understand LLM and build application with prompt engineering and Langchain
 - Langchain
4. Building RAG system with LANGHAIN
 - Vector database (eg chroma, pinecone, etc)
5. Fine Tunning LLMs
6. Building AI agent
